

Nike CUFF Battery

WARNING! Keep watch batteries away from children. If swallowed, contact a doctor immediately.

WARNING! Batteries contain chemical substances. They should be disposed of properly according to local regulations.

Watch

Battery Type: CR2016 3V Lithium

Battery Life:

The battery is estimated to last 3 years depending on frequency and use of certain features.

Battery Replacement:

If the back case is sealed, you will need to send the watch to our authorized service center. We strongly recommend you do not remove the watch back yourself.

Here's why.

Many of our watch designs use special gaskets that create a water tight seal between the back plate and the watch case. The greatest risk of changing the battery yourself, or having a jeweler do it, is that this gasket will not be replaced properly. In this case water damage can occur. In addition to ensuring that your watch is water tight, our service centers will clean the components and replace damaged parts. Customer feedback on the price, duration and headache of this process has prompted us to start putting user serviceable battery hatches in our watches whenever possible.
